

## Directions for Installing RedButton Software:

Note: The RedButton software is free to distribute and use. No warranty is provided by anyone, and the user assumes all responsibility for its use.

1. Download the RBP ISO and Release Notes PDF files.
2. Burn the iso DVD image to make RBP DVD.
3. Boot the RBP DVD.
4. Plug in an empty USB flash drive (2GB or larger).
5. Within the RedButton Software, click this menu sequence: System -> Administration-> USB Startup Disk Creator
6. On the USB menu, maximize the "reserved extra space" by moving the slider to the right.
7. Click the "Format" button if it appears.
8. Click the "Make Startup Disk" button.
9. It will take several minutes to complete the flash.
10. Shut down the system by clicking the red shutdown icon in the upper right corner of the Desktop.
11. Remove the DVD. (It can make additional USB drives for your friends.)
12. You are ready to use your RBP bootable flash drive with your PC.
13. Follow the Release Notes for use.
